

CALL FOR PAPERS

Guest Editor: Grant Taylor, Science Director, +play

Issue Focus: Positive Patient Participation

Improved access to health information, cultural changes in the patient-healthcare provider relationship, and the growing significance of chronic disease management has challenged healthcare providers to respond to patients' needs and expectations for greater control over decision making. How can they best do this?

We invite submissions to this special edition. They should address one or more of four outcomes:

1. The role of the patient in their own health care
2. Patient knowledge for successful engagement
3. Self-care skills
4. Environmental factors affecting patient participation.

Types of submissions:

- Editorial
- Case Studies
- Clinical Audits
- Research
- Review
- Insight (Clinical, Design, Research)
- Infographic
